Departmental Seminar

What is “intelligence” and is it inherited?

3:00 p.m. – 4:00 p.m. | November 8, 2017 (Wednesday)
Social Sciences Chamber | 11/F The Jockey Club Tower | Centennial Campus | The University of Hong Kong

Dr. Julie Evans
Faculty of Brain Sciences
University College London

Abstract

This talk will explore historical and current psychological perspectives on the definition of “intelligence” and how it is measured and the variable contributions of genetic and environmental influences on the development of “intelligence”. Dr. Evans will then briefly outline the work of the Faculty of Brain Sciences and educational opportunities at Masters and PhD level.
