

Research on Music and Reading

To explore the effects of background music on reading, we are recruiting research participants who are:

- 18 – 35 years old
- without hearing or visual impairment
- okay with background music during reading/self-learning

Duration: ~ **2 hours**

Venue: an eyetracking lab in HKU campus

Remuneration: **HK\$150**

Task: To read some passages with or without background music, with eye movement, physiological data and facial expressions being recorded. There are also several cognitive tests without music.

Interested? Please the Registration Form linked below.
